## Number -Place Value

Read and write numbers to at least 1000000 and determine the value of each digit
Interpret negative numbers in context, count forwards and backwards with
positive and negative whole numbers through zero

- Understand the relationship between powers of 10 from 1 hundredth to 10 million, and use this to make a given number $10,100,1,000,1$ tenth, 1 hundredth or 1 thousandth times the size (multiply and divide by 10,100 and 1,000 ). 6NPV-1
-read, write, order and compare numbers up to 10000000 and determine the value of each digit and compose and decompose numbers up to 10 million using standard and nonstandard partitioning (6PV-2)
-Reason about the location of any number up to 10 million, and compose and decompose numbers up to 10 million, using standard and non-standard partitioning. (6NPV-3)
- round any whole number to a required degree of accuracy (6NPV-3)
-Divide powers of 10 , from 1 hundredth, to 10 million, into $2,4,5$ and 10 equal parts and read scales/ number lines with labelled intervals divided into 2,4,5 and 10 equal parts (6NPV4)
-use negative numbers in context, and calculate intervals across zero

Number - Four operations
Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy
Identify multiples and factors, including finding all factor pairs of a number and common factors of two numbers
Divide numbers up to 4 digits by a one-digit number using a formal written method of short division and interpret remainders appropriately for the context
-Perform mental calculations, including with mixed operations and large numbers - Understand that 2 numbers can be related additively or multiplicatively, and quantify additive and multiplicative relationships (multiplicative relationships restricted to multiplication by a whole number). 6AS/MD-1

- Use a given additive calculation to derive or complete a related calculation, using arithmetic properties, inverse relationships and place value understanding.

## (6AS/MD-2)

-identify common factors

- multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
-divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context -divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to context

| Summer 2 | Revision and Reinforcement of targeted areas <br> Investigations and preparation for KS3 |
| :---: | :---: |
| Continuous <br> Objectives <br> The continuous objectives are woven into the teaching continually during the year. <br> Children are given continual and regular opportunities to apply their knowledge to problem solving and reasoning. | Solve number and practical problems that involve number and place value -solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why <br> -solve problems involving addition, subtraction, multiplication and division <br> -use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy <br> -solve problems which require answers to be rounded to specified degrees of accuracy <br> -solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts -solve problems involving the calculation of percentages [for example, of measures, and such as $15 \%$ of 360 ] and the use of percentages for comparison -solve problems involving similar shapes where the scale factor is known or can be found <br> -solve problems involving unequal sharing and grouping using knowledge of fractions and multiples. <br> -solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate |
| Key Basic skills to be taught continuously through the year | Count forward and backwards in steps of powers of 10 for any given number up to 10000000 <br> Count forwards and backwards with positive and negative whole number including zero and calculate intervals across zero <br> Read, write, order and compare numbers up to 10000000 and determine the place value of each digit <br> Partition numbers into place value columns <br> Partition numbers in different ways <br> Round any whole number to a required degree of accuracy <br> Use rounding to support estimation and calculation <br> Use knowledge of place value to derive new addition and subtraction facts <br> Recognise and use square and cube numbers <br> Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers. <br> Establish whether a number up to 100 is prime and recall prime numbers up to 19 <br> Double any number between 1 and 1000 and find all corresponding halves Add and subtract mentally with jottings with increasingly large numbers to aid fluency <br> E.g. HthTthTHTU $\pm$ TthTHTU TthTHTU $\pm$ THTU HTU. $\pm$ TU.t <br> Multiply and divide whole numbers and those involving decimals by 10,100 and 1000 giving answers up to 3 decimal places <br> Perform mental calculations including with mixed operations <br> Count up and down in tenths, hundredths and thousandths in decimals and fractions including bridging zero for example on a number line Use their knowledge of the order of operations to carry out calculations involving the four operations |

$\square$

Use factors to simplify fractions
Compare and order decimals and fractions including fractions $>1$
Calculate simple percentages of amounts
Recognise mixed numbers and improper fractions and convert from one form to another and write mathematical statements $>1$ as a mixed number Derive decimal complements to 1 working with decimals up to 3 decimal places Recall and derive equivalences between fractions, decimals and percentages Convert between money and measures including time
